**FINANCE TRANSFORMATION | FP&A | PROCESS CONTROLS & COMPLIANCE | AUTOMATION | STAKEHOLDER MANAGEMENT**

## PROFESSIONAL SUMMARY

Finance professional (MBA) with 2+ years across FP&A and financial operations in a regulated NBFC environment, with direct experience in process controls, reconciliation, compliance documentation, and automation of recurring finance workflows. Comfortable owning a process end to end, from identifying a control gap, to building the fix, to reporting results to stakeholders, and translating manual, error-prone workflows into standardized, automated ones using Excel, Power BI, and Python.

## WHY I'M A STRONG FIT

- I've run finance processes end to end, not just analyzed them: budgeting/forecasting (FP&A), transaction reconciliation and vendor-payment controls (PTP-adjacent), and management reporting, each with clear service-level ownership and measurable results.
- I build the controls and compliance culture this role asks for as a habit: I built a vendor-rate validation control at ArtHousing before anyone assigned it, taking TDS misapplication to zero and keeping audit-ready documentation as standard practice, not an afterthought.
- Transformation and automation are already how I work. I've used Power Query, Macros/VBA, Power BI, and Python/Streamlit to cut recurring reporting and reconciliation cycles from hours to minutes, the same standardize-and-automate mandate this role is built around.
