BUSINESS FINANCE | FP&A | BUDGETING & FORECASTING | VARIANCE ANALYSIS | POWER BI & EXCEL MODELING

PROFESSIONAL SUMMARY

Finance professional with 2+ years in Business Finance/FP&A, creating and tracking monthly and annual P&Ls, driving revenue and cost variance analysis against the annual plan, and building budgeting and forecasting models independently. Comfortable working with ambiguity and minimal supervision — self-directed in identifying cost deviations, building controls, and automating reporting. Strong Excel modeling skills and working knowledge of Power BI; builds financial dashboards and coordinates with cross-functional stakeholders on fund and cost visibility.

WHY HIRE ME FOR THIS ROLE

- Creating, tracking, and analyzing P&Ls is my core, current work — I independently identified ₹25L+ in cost deviations across 5 cost centers and turned them into corrective action within 15 days, the same variance-to-action loop this role owns.
- I've already run budgeting and forecasting end-to-end, not just supported it — I standardized the annual budgeting and quarterly forecasting cycle across 5 departments, cutting it from 4 weeks to 11 days and improving accuracy 18% quarter-on-quarter.
- I work well in ambiguity without much supervision — I noticed a ₹18L unbilled-revenue gap no one was tracking and built the tracker myself, and built a TDS control from scratch because a compliance gap existed and no one had closed it.
