- Entered and validated case data accurately in internal systems and kept organized documentation so every decision could be traced and audited.
- Monthly reporting took 4 hours per cycle through manual matching. Automated it with Power Query, Macros/VBA and Power BI, cutting preparation to 35 minutes and delivering on Day 1 of close instead of Day 3.
- Entries across 5 cost centers showed unexplained deviations. Verified every entry against budget and worked with finance and business teams to resolve them, closing ₹25L+ in deviations within 15 days.

Associate *Nov 2024 – May 2025*

- Underwrote loan applications by reviewing applicant details and supporting documents, assessing risk against lending guidelines, and recording accurate decisions and documentation for compliance review.
- Daily data reconciliation across 5 systems took 3 hours and left 8 to 10 unmatched items. Rebuilt it with Excel Power Query, cutting time to 40 minutes and unmatched items to under 2, with zero carryover in 11 of 12 months.
- Incorrect vendor rates were reaching approval undetected, creating TDS risk. Designed a vendor rate validation control, taking TDS misapplication to zero over two quarters and avoiding filing penalties.
- Flagged discrepancies had no consistent follow up. Closed every exception with internal teams within set timelines and kept detailed audit-ready documentation.
